alishreif101010@yahoo.com
London, UK

TECHNICAL SKILLS

Python
MATLAB & Deep Learning Toolbox
PySpark & Spark MLLib
SQL
Java & C/C++
React & Flutter
Git & Agile

LANGUAGES

Arabic ●●●●●
English ●●●●●
French ●●●●●

CERTIFICATION

Full-Stack Software Engineering Bootcamp -
SE Factory

Profile

AI Engineering student at the University of East London with a BS in Computer & Communication Engineering (CCE). Hands-on experience across computer vision, deep learning, scalable machine learning, big-data analytics and software/embedded systems. Built and evaluated end-to-end academic projects using MATLAB, PySpark, Java and ESP32 technologies, with a strong focus on reproducible evaluation, practical engineering and clear communication. Currently seeking internships, graduate opportunities and junior AI/ML roles in the UK.

Education

University of East London

In Progress

AI Engineering - Current Student

- Coursework in deep learning, computer vision, machine learning and big-data analytics.
- Completed technical projects using MATLAB and PySpark, with emphasis on reproducible model evaluation and scalable data processing.

Lebanese International University (LIU)

2021 - 2025

BS in Computer & Communication Engineering (CCE)

Key Projects

Industrial Metal Surface Defect Classification

2026

Individual deep-learning computer-vision project | MATLAB

- Built an end-to-end five-class pipeline across 15,000 metal-surface images.
- Benchmarked a custom CNN, EfficientNet-B0 and AlexNet across six training configurations.
- Selected EfficientNet-B0 using validation metrics; achieved 100% test accuracy on the controlled project dataset while explicitly evaluating generalisation limitations.

Network Intrusion Classification with PySpark

2026

Big-data / machine-learning project | PySpark, Spark MLLib

- Contributed to a distributed multiclass classification project processing approximately 2.52M network records across seven traffic classes.
- Implemented and evaluated the Decision Tree baseline in PySpark using reproducible preprocessing and model evaluation.
- The project also included ensemble learning, PCA and K-Means clustering for supervised and unsupervised analysis.

Smart Pharmacy - Senior Capstone Project

2024 - 2025

Assistive IoT & mobile healthcare system | Java, ESP32, embedded systems

- Co-designed an ESP32-based medication dispenser with an Android mobile app for medication scheduling and tracking.
- Integrated servo-controlled drawers, sensors, LEDs, buzzer and recorded audio to support accessible medication reminders.

Work Experience

Hospitality & Customer Service - Baba Ghanouj, London

Present

- Deliver front-of-house customer service in a fast-paced restaurant environment, handling guest requests and supporting smooth service.
- Work closely with colleagues to maintain service quality, accuracy and a positive customer experience.

Barista - Starbucks, Beirut

2020 - 2021
